## Comparison Wake Vortices Heavy Non Heavy

**operations sib no.: 2017-10 issued: 22 june 2017 subject ...** - weight of the generating aeroplane: heavier aeroplane types generate stronger wake vortices and are likely to induce more severe wake turbulence encounters, especially for smaller aeroplane types. **acoustic properties of aircraft wake vortices - elib.dlr** - wake vortices were acoustically detected in 80 percent of the flyovers. lowest detection rates were observed for the newer aircraft types airbus 319, 320 and boeing 737-800. a comparison of the wake trajectories obtained by phased microphone arrays and lidar revealed that the detection capability of the latter is superior. 1. introduction aircraft wake vortices represent a major constraint for ... **critical wake vortex encounter scenarios - wakenet** - related piloted simulator tests and allow the comparison of the hazard that vortices of different generator aircraft exert on a follower aircraft. the wcs is based on a high fidelity, offline simulation of the follower aircraft that includes the interacting wake vortex, a hazard criterion that rates the severity of each wve, and a pilot model. it can be formulated as an optimisation problem ... **worst-case analysis of wake vortex induced risk of 700ft ...** - nlr air transport safety institute 15-1-2009 10 strength of wake vortices generated by medium/heavy aircraft at 2000ft generating aircraft parameters: **impact of individual and dynamic wake vortex separations ...** - hazard generated by wake vortices. in order to alleviate capacity limitations, separation rules have to be improved without reducing safety. based on simplified hazard areas dynamic wake vortex separations can be derived taking into account atmospheric conditions and actual aircraft pairing. this concept is applied to parallel runways in comparison to the single runway case for cross wind and ... **aircraft wake vortex evolution in ground proximity ...** - comparison to wake predictions out of ground effect indicates that in ground effect 1) the rapid-decay phase progresses slower, 2) wake-vortex evolution can be predicted with improved accuracy, and 3) fair prediction skill requires only limited environmental data. **characterization of aircraft wake vortices by 2-µm pulsed ...** - strong vortices generated by heavy aircraft present a potential hazard to other aircraft following close behind. in times of increasing air traffic and aircraft dimensions, the wake-vortex issue is becoming more and more important for flight safety, airport capacity, and aircraft design. several research programs based on simulations, model calculations, wind channel and water tank mea ... **wake turbulence ryan brookes director applied vehicle ...** - wake turbulence. ryan brookes. director - applied vehicle systems. defence technology agency **pilot and air traffic controller guide to wake turbulence** - section 2 2.1 pilot and air traffic controller guide to wake turbulence section 2 2 2.0 introduction the pilot and air traffic controller guide to wake turbulence is one part of the wake **wake turbulence re-categorisation on approach and ...** - trails wake vortices. the trailing vortices roll-up into a pair of coherent, counter-rotating vortices that can persist for several minutes after the the generating aircraft has flown by, potentially causing a hazard to any following aircraft that may encounter these vortices. the trailing vortices' rate and time to dissipate depend on the weight, size, wing configuration and speed of the ... **an improved understanding of en-route wake vortex encounters** - vortices, hence they can induce more severe wake turbulence. therefore this simulation therefore this simulation computes only the wake vortex trajectories of all the 'heavy' aircraft. **aircraft wake vortex detection using continuous-wave radar** - the image pair wake vortices. the width of the cell is slightly less the width of the cell is slightly less than the wing span of the generating aircraft and can contain **wake vortex transport in proximity to the ground david w ...** - wake vortex transport in proximity to the ground david w. hamilton and fred h. proctor nasa langley research center mail stop 156a hampton, virginia 2368 1 -2 1 99 **meteorology and wake vortex influence on american airlines ...** - april 2004 nasa/tm-2004-213018 meteorology and wake vortex influence on american airlines fl-587 accident fred h. proctor, david w. hamilton, and david k. rutishauser **radar sensors for wind & wake- vortex monitoring on ...** - the x-band radar has successfully detected wake vortices generated by aircraft of categories heavy and medium in rainy conditions. the bor-a x-band radar has detected wake vortices up to 1350 m above the instrument.
